

EdTech Content Development & Instructional Design Consultant

The role is an experienced professional who will oversee an evolving and high-performing team of curriculum/instructional designers, content writers, audio-visual teachers, assessment developers and quality assurance reviewers.

The ideal candidate must be an Education expert with strong project and entrepreneurial mindset to support the development of learner-centered educational contents. He/She must have the adaptability and business acumen to thrive in a fast-paced, proactive and detail-oriented start-up environment.

Responsibilities

- Collaborate and align with technical and non-technical teams to translate learning needs into well-detailed curriculum, content and instructional design requirements.
- Work with subject matter experts (SME) to develop accurate, relevant and adaptable learning content based on approved curriculum and cultural guidance.
- Provide relevant pedagogical and methodological guidance on the development of learning assets like audio classes, video animations, interactive interfaces, simulations, screencasts, infographics etc.
- Develop performance-based learning objectives and ensure learning assets achieve those objectives through effective design practices, testing, and other user experience best practices.
- Lead the review, adaptation and contextualisation of e-learning contents to deliver desired learning outcomes for different students' group.
- Lead the quality assurance of all the learning contents through a network of independent and in-house reviewers.
- Lead the recruitment, onboarding and support of a network of content creators/teachers
- Work with subject matter experts to create relevant and customised education curriculum for multiple content areas.
- Lead the process of learning enhancement by receiving and incorporating learners' feedback via a co-creative and iterative content enrichment cycle.
- Provide direction and guidance, hands-on support, oversight, and support to deliver on time with optimal quality.
- Contribute to on-going process and methodology improvements.
- Strong and genuine passion for education and nation building through inclusive learning.

To apply, send CV to hr@datasciencenigeria.ai with Subject as **EdTech CDID**
